## PROFESSIONAL SUMMARY

MSc Artificial Intelligence student and Software Engineering graduate with hands-on experience in designing, developing, and deploying end-to-end machine learning, deep learning, NLP, and computer vision solutions—from data preprocessing and model training to REST API deployment. Developed a transformer-based fake news detection platform and a medical imaging classifier achieving 91.62% accuracy and a mean ROC-AUC of 0.983. Combines a strong foundation in mathematics and software engineering with practical expertise in Python, machine learning, and backend development. Seeking opportunities to apply my expertise in AI, machine learning, and software engineering while contributing to innovative and impactful projects.

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL, Java, JavaScript
**Machine Learning & Deep Learning:** Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Transfer Learning, Transformer Models (BERT, RoBERTa), Feature Engineering, Model Evaluation, Explainable AI (SHAP)
**Frameworks & Libraries:** PyTorch, TensorFlow, Keras, scikit-learn, pandas, NumPy, spaCy, OpenCV, MediaPipe, XGBoost
**Backend & APIs:** FastAPI, Flask, REST APIs, SQLite, Firebase
**Cloud & Tools:** Microsoft Azure (Service Bus, Blob Storage), Git, GitHub, Jupyter Notebook, Agile/Scrum

## PROFESSIONAL EXPERIENCE

**Associate Software Engineer (Contract, Part-Time) — Spotto AI | Remote** *Aug 2025 - Oct 2025*

- Built and maintained cloud-based backend services and application features for production environments
- Designed and developed ETL data pipelines for automated business data processing using Azure Service Bus and Azure Blob Storage
- Delivered software features on schedule within Agile sprint cycles, collaborating closely with a senior technical lead

**Software Engineering Intern — MindReading Technologies | Remote** *Jun 2025 - Jan 2026*

- Developed and maintained web application features using modern JavaScript technologies
- Contributed to debugging, testing, performance optimization, and peer code reviews within an Agile team

## KEY PROJECTS

**FakeGuard — Time-Aware Fake News Detection Platform**
*Python, FastAPI, RoBERTa, BERT, XGBoost, spaCy, VADER, TF-IDF, SHAP, SQLite*

- Built an end-to-end fake news detection system combining transformer-based classification, content mutation analysis, emotional manipulation scoring, and temporal credibility tracking
- Fine-tuned transformer models on the LIAR dataset, implementing data preprocessing, cross-validation, explainability (SHAP), and error analysis workflows
- Developed FastAPI REST services with automated article monitoring, credibility score updates, and dashboard visualization

**Brain Tumour MRI Classification**
*Python, TensorFlow, Keras, EfficientNetB0, scikit-learn*

- Achieved 91.62% test accuracy and 0.983 mean ROC-AUC classifying MRI scans into four tumour categories using EfficientNetB0 transfer learning
- Diagnosed a preprocessing mismatch that improved model accuracy from approximately 33% to 91.62%
- Applied data augmentation, dropout regularization, early stopping, and learning rate scheduling to prevent overfitting

**AI Gesture-Based Communication System**
*Python, TensorFlow, OpenCV, MediaPipe, Flask, Firebase*

- Developed a real-time gesture recognition platform enabling communication for speech-impaired children, achieving 99.1% accuracy across 25 participants
- Built an end-to-end ML pipeline covering data collection, preprocessing, model training, inference, and deployment with REST API integration
- Designed privacy-first, on-device gesture processing with multilingual educational workflows and progress tracking

## EDUCATION

**MSc Artificial Intelligence (In Progress) — University of Bedfordshire** *Mar 2026 - Mar 2027*
Relevant modules: Applications for Artificial Intelligence — First Class (75%); Natural Language Processing (NLP) & Generative AI (LLMs, Hugging Face, RAG) — in progress

**BSc (Hons) Software Engineering, Second Class Upper — University of Bedfordshire** *Graduated 2025*

**Higher National Diploma in Information Technology — SLIIT City University** *2022 - 2024*

## LANGUAGES

English (Fluent) | Sinhala (Advanced) | Tamil (Native)
